

# GLI-HANGAR

**Pulling your aircraft out to check the GPS navigation system?**

**GLI-HANGAR** allows ongoing testing, calibration and troubleshooting of aircraft GPS navigation systems inside the hangar. The need to perform maintenance outside of the protective shelter is eliminated. Even the delay of maintenance due to inclement weather or the placement of other aircraft is eliminated. Maintenance efficiencies can be immediately recognized, as accessibility to work on the GPS navigation becomes more convenient. Save time, save fuel and save money with a hangar using **GPS Live Inside**.

Aircraft can receive a continuous, high quality GPS signal from within the aircraft hangar.

## Features and Benefits

- Immediate Return on Investment - Pays for itself the 1st time with elimination of fuel usage and limited flight crew
- GPS signal throughout entire hangar - No doubt that GPS is 100% operational
- Maintains "Hot" GPS ephemeris enabling immediate taxi
- Allows 100% system functional test, including the application's receive antenna system
- Engineered for easy installation and operation, (including a pictorial user manual)
- Requires little or no maintenance
- Adjustable GPS re-transmitter mount - Can position unit for maximum signal strength and coverage
- Completely weatherized and waterproof
- Mounting hardware - Options for any specific Aircraft Hangar interior

# GLI-HANGAR

## Includes . . .

- All System Hardware
- Mounting Brackets
- Coaxial Cabling
- User/Installation Manual
- 1-year Warranty of Full System
- Power Configuration for Any Country
- CE Approved System Available\*

### Options:

Solar Power  
Extended Warranty

*\*Request CE Approved System When Ordering*

**GPS Live Inside (GLI)** is made by GPS Source, Inc. Located in Pueblo, Colorado, approximately 30 miles from Schriever AFB (home of U.S. Space Command), GPS Source is a 100% veteran owned small business. With over 60 years of collective experience in the Global Navigation Satellite Systems (GNSS) industry, GPS Source is the world's leading specialist in GNSS signal distribution. GPS Source designs and builds solutions that bring GPS Live Inside, eliminating costly delays and saving time.
