

## PRODUCTS :

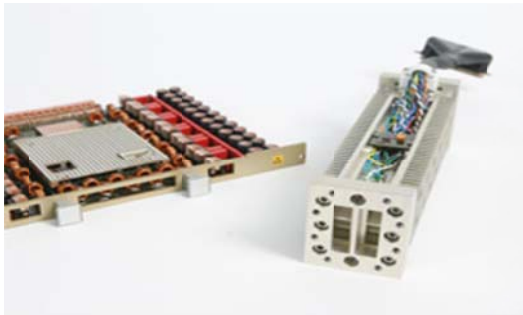

### (1). Microwave Components :

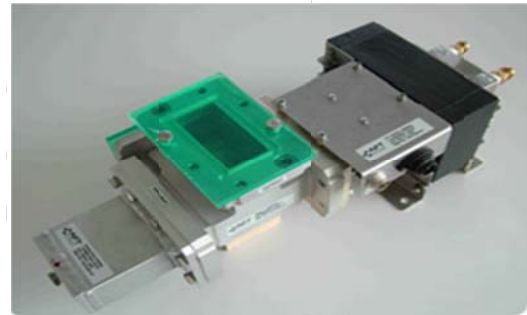

Circulators / Insulator

Absorber

Phase shifter

Fast Ferrite Tuners / I-Q-modulators

### (2). Ferrites and dielectrics :

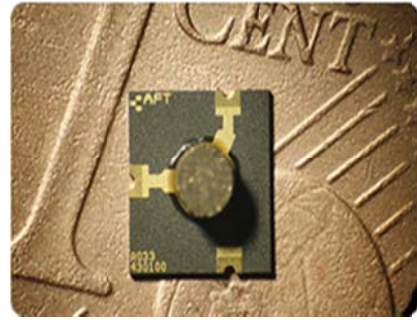

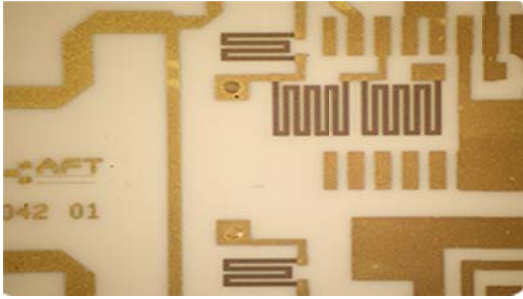

Ferrites  
Dielectrics  
Ceramic processing

### (3). Thin film technology:

Ashram Road,  
Ahmedabad-380009, Gujarat, India

We produce gold and copper conductor line structures and offer front and back process. In addition resistance layers with different surface resistivity can be chosen.

Our thin film production employs dielectric polyimide structures as air bridges, capacitors or carriers for a second conductor area.

Mechanic treatment of the substrates is effected by laser. This innovative procedure offers a variety of external substrate contours, windows and cavities.
